</table>

MANDATE	
Mandate	Aligned to EXIM Bank’s Mandate to provide credit facilities to finance and support the export of goods with emphasis on non-traditional markets, whereby 87% of AGB’s sales are derived from the export of a wide range of edible oils (cooking oils), primarily palm oil, to the Middle East, Africa and Asia markets. The transactions are invoiced out of Malaysia and the source of payment to service the financing is derived from international sales. The financing further supports the Mandate’s value-creation principles through the utilisation of domestic resources (palm oil) and the sustenance of local employment opportunities.
Additionality	Design Additionality – delivering impact to target beneficiaries: since EXIM Bank onboarded AGB in 2023, the Group has achieved upward migration with an improving performance trend, consistent with the PMF’s quantitative design indicators (i.e. increase in customer’s revenue from the previous year and increase in export value), as reflected below:

FYE	Revenue (RM’000)	EBITDA (RM’000)
2025 (audited)	828,690	19,890
2024 (audited)	445,106	13,643
2023 (audited)	337,940	11,913

	Furthermore, AGB's nature of business is aligned to EXIM Bank's Financial Additionality of narrowing funding and inclusion gaps by providing financing to the underserved segment, as the Group exports to non-traditional markets such as Yemen, Lebanon, Jordan, Djibouti, Congo and Sudan (i.e. destinations with an annual export value of less than RM1.0 billion based on a 5-year moving average of exports per MATRADE's trade statistics).
ESG Initiatives	**Environmental** Agro 19 Group is committed to environmental conservation and to preventing incidents relating to pollution, safety, health and the welfare of workers and personnel under the Group's control. The management team is planning to install solar panels on the factory rooftop to reduce reliance on grid electricity. The Group is producing their in-house plastic bottles/jerry cans for packaging of cooking oil. The raw material for the plastic bottles/jerry cans is PET plastic, which is 100% recyclable and environmentally friendly, generating less solid waste, consuming less water and producing fewer emissions detrimental to air and water quality during production. **Social** Agro 19 Group is working diligently to ensure that local communities benefit economically, and that gender equality and human rights matters are regularly addressed. **Governance** Agro 19 Group has distributed responsibility for ESG integration across the organisation to ensure sustainable production and the efficient use of resources.
Climate Change and Principle-Based Taxonomy ("CCPT")	C5b – Watchlist. The classification reflects the palm oil sector's exposure to climate and environmental considerations, principally the land-use and deforestation risks associated with upstream plantation activities. AGB's direct exposure is limited by its downstream position in the value chain (processing and packaging of edible oils, with no plantation operations). Further mitigants include the Group's 100% recyclable PET packaging, the planned rooftop solar installation and the ESG responsibilities distributed across the organisation as outlined above. The emerging El Niño conditions (expected to peak between November 2026 and March 2027) represent a supply-side physical climate risk to CPO availability rather than to the Customer's processing operations and have historically been supportive of CPO prices. (Source: MBSB Research, 29 June 2026) AGB's key export markets in the Middle East, Africa and Asia are currently subject to less stringent sustainability-linked import requirements relative to markets such as the EU, limiting the Group's near-term exposure to regulatory transition risk.

1. REQUESTS

To seek the GCC's approval and, thereafter, the GBCC's endorsement of the following requests:

Request 1
Additional SF-i 3 facility by RM40.0 million making a total of RM80.0 million.

Request 2
To reinstate the SF-i 3 pricing from COF+3.50% to the original rate of COF+2.75%.

Request 3
To seek waiver of the Conditions Subsequent of SF-i 3, SF-i 4, SF-i 5 and RC-i for:

i. The Bank shall advise the Customer to consolidate a portion of banking facilities maintained with other banks and/or Financial Institutions.
ii. Trade Credit Takaful (as priority)/Insurance to cover at least a portion of the Buyer's payment risk (whichever is acceptable by EXIM Bank).

Request 4
Annual review and renewal for following existing facilities by 1 year up-to 27 June 2027:
i. SF-i 1 of RM10.0 million.
ii. SF-i 2 of RM30.0 million.
iii. SF-i 3 of RM40.0 million.
iv. SF-i 4 of RM5.0 million.
v. SF-i 5 of USD3.0 million.
vi. RC-i of RM5.0 million.

Note:

(i) The Group's aggregate exposure of RM227.26 million equivalent, which includes RM15.0 million of exposure with SME Bank, exceeds the RM50.0 million approving-authority threshold. This application therefore requires GCC approval and GBCC endorsement.
(ii) This proposal is to be read together with the AGI's Annual Review.

2. FACILITY

Facility	Purpose	Tenor	Pricing
SF-i 1 (pre-shipment) (SIP2)	To finance the Supplier's Invoice for the purchase of raw materials including palm oil and other business-related products.	150 days	COF-i + 2.75% p.a.
SF-i 2 (pre-shipment)	To finance the Supplier's Invoice for the purchase of raw materials including palm oil and other business-related products.	150 days	COF-i + 2.75% p.a.
SF-i 3 (pre-shipment)	To finance the Supplier's Sales contract, Pro-forma invoice and/or Invoice for the purchase of raw materials including palm oil and other business-related products.	150 days	COF-i + 3.50% p.a.
SF-i 4 (pre-shipment) (SIP2)	To finance the Supplier's Sales contract, Pro-forma invoice and/or Invoice for the purchase of raw materials including palm oil and other business-related products.	150 days	COF-i + 2.75% p.a.

SF-i 5 (pre-shipment)	To finance the Supplier's Sales contract, Pro-forma invoice and/or Invoice for the purchase of raw materials including palm oil and other business-related products.	150 days	USD COF-i + 2.00% p.a.
RC-i (SIP2)	To finance the related cost of the Customer's operation including but not limited to the administrative, operating expenses and any other expenses in relation to the Customer's business nature as per the utilization items listed in Appendix 1B, Clause – Disbursement/ Utilization of the Letter of Offer.	5 years (Rollover 3 or 6 months)	COF-i + 2.75% p.a.

Note: The margin of financing is 100% for all facilities.

<tr><td colspan="2"><u>Business Profile</u>

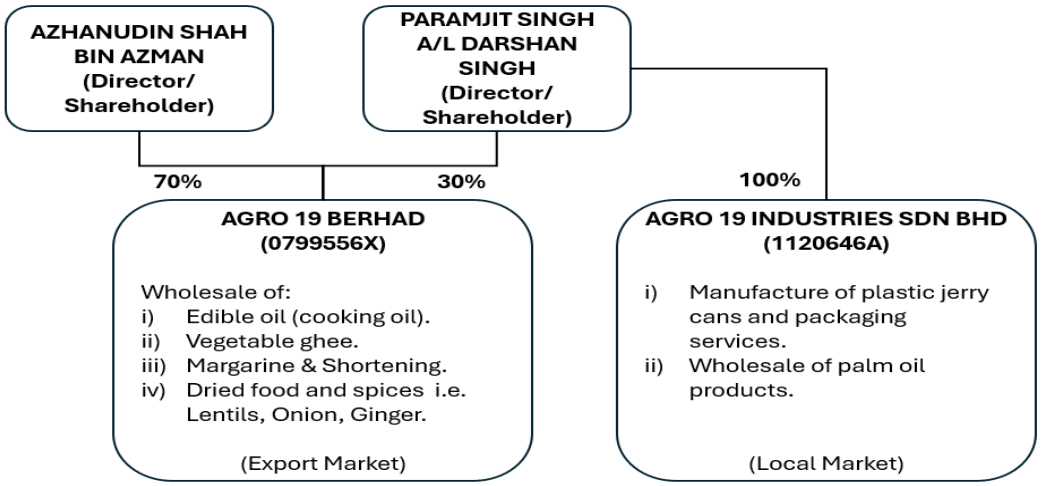

Agro 19 Group comprises two companies under common directorship:

1. AGB wholesales edible oils, including cooking oil, vegetable ghee, shortening and margarine, as well as dried food and spices. Its sales are predominantly export-driven, with 87% derived from overseas markets and 13% from the domestic market.</td></tr>
</table>

2. AGI manufactures plastic jerry cans, provides packaging services and wholesales palm oil products. Its customer base consists mainly of local palm oil and cooking oil exporters. AGI is expanding its palm oil trading activities, which complement AGB's core business.

The corporate structure below illustrates the relationship between AGB and AGI under common directorship.

Agro 19 Group Corporate Structure

AGB was incorporated on 13 December 2007 and has operated for approximately 18 years. Its principal activity is the wholesale of premium edible oils, including Refined, Bleached and Deodorised ("RBD") palm olein, sunflower oil, cottonseed oil, soybean oil, corn oil, coconut oil and canola oil. The products are exported mainly to the Middle East, Africa, Australia and Asia, including non-traditional markets such as Yemen, Jordan, Djibouti, Lebanon and Congo.

AGB is diversifying its product range to include vegetable ghee, shortening, margarine, dried food and spices such as lentils, onions and ginger. The broader portfolio supports brand growth, entry into new markets and cross-selling opportunities. AGB also provides original equipment manufacturing ("OEM") services to retailers, wholesalers and distributors.

AGB participates annually in the Gulfood Exhibition in Dubai, United Arab Emirates, to strengthen its international presence, develop new buyer relationships and identify opportunities in existing and new export markets.

Management Profile

Captain Azhanudin Shah Bin Azman, Aged 57 (Director/70% Shareholder)

Captain Azhanudin Shah began his career as a pilot with Malaysia Airlines in 1990, where he worked with Captain Paramjit Singh for more than 20 years. He later joined AirAsia X as a pioneer employee and served as Chief Operating Officer before leaving the company. He currently flies for Qatar Airways while managing his business interests. Captain Azhanudin Shah joined AGB as a director in 2013 and holds a 70% equity interest, with primary responsibility for marketing. He is also a director and shareholder of UDH Ventures Sdn Bhd, Vertical Target Sdn Bhd and Agensi Pekerjaan Vertical Sdn Bhd, which are involved in automotive services and private employment agency activities.

Captain Paramjit Singh A/L Darshan Singh, Aged 56 (Director/30% Shareholder)
Captain Paramjit Singh began his career as a pilot with Malaysia Airlines and accumulated 24 years of aviation experience. He resigned in 2014 from his positions as airline captain and examiner to pursue his own business interests. He was appointed a director of AGB in 2015 and holds a 30% equity interest. In 2019, he became a director and the sole shareholder of Agro 19 Industries Sdn Bhd. Captain Paramjit Singh oversees business operations and strategic planning. He is also a director and shareholder of Satu Wawasan Security Services Sdn Bhd and Agensi Pekerjaan Vertical Sdn Bhd, which are engaged in private security and private employment agency activities, respectively.

Business Operations

Agro 19 Group operates from three factory premises, with production running 24 hours a day, seven days a week, as follows:

i. No. 3, Jalan Helang Hindik, Kepong Baru Tambahan, 52100 Kuala Lumpur, Wilayah Persekutuan Kuala Lumpur.

The premise is used for the storage of refined oils and as a warehouse for dried food and spices.

ii. No. 1, Jalan SKI 6/KU, Lebuh Sungai Kapar Indah, Kawasan Perindustrian Hi-Tech, 42200 Klang, Selangor (This premises is sharing with related company, Agro 19 Industries Sdn Bhd).

The premise houses the administrative office, palm and vegetable oil storage tanks, packaging lines and warehouse. It is owned by AGB and shared with the related company, Agro 19 Industries Sdn Bhd.

iii. No. 9, Jalan Bestari 1/KU 7, Taman Perindustrian Kapar Bestari, 42200 Kapar, Selangor, located ~2km from the Klang factory.

The premise houses the plastic jerry can production plant, which currently operates eight blow-moulding machines, and a warehouse.

Sales Overview

AGB's sales profile is predominantly export-driven, supported by a diversified product range and an established presence across the Middle East, Africa, Asia and Australia, as summarised below.

Sales Composition		
Products	**Sales**	**Market**
RBD (Refined, bleached and deodorised) Palm Olein	82%	Malaysia (6%)/ **Overseas (94%)**
RBD Sunflower Oil, RBD Cotton Seed Oil, RBD Soybean Oil, RBD Canola Oil, RBD Coconut Oil, RBD Corn Oil, Olive Oil, Vegetable Ghee, Shortening, Margarine	11%	Malaysia (32%)/ **Overseas (68%)**
Dried food and Spices	7%	Malaysia (62%)/ **Overseas (38%)**
Total	**100%**	

AGB's 2025 export sales by destination country as follows:

Country	% of Total	% of Export
Yemen	43.88%	50%
Africa	16.68%	19%
Vietnam	6.92%	8%
Sri Lanka	5.49%	6%
Australia	3.97%	5%
Oman	3.68%	4%
Thailand	3.08%	3%
Syria	1.13%	1%
UAE	0.80%	1%
Lebanon	0.32%	0%
Iran	0.04%	0%
Total Export Sales	**87.35%**	**100%**

In 2025, exports accounted for 87.35% of total sales, confirming the export-led nature of AGB's business. RBD palm olein remained the principal product, contributing 82% of total sales, with 94% sold overseas. Export sales were generated across a broad range of markets, with Yemen contributing 50% of export sales, followed by Africa at 19%, Vietnam at 8%, Sri Lanka at 6% and Australia at 5%.

The established export footprint, together with predominantly advance payment terms among the major buyers listed below, supports cash-flow visibility and mitigates collection risk. The scale and composition of sales demonstrate sustained demand for AGB's products and support the continued availability of working-capital facilities to fund raw-material purchases and fulfil export orders.

Sales/ Major Buyers

Buyer(s)	Product(s)	Dealing (Years)	% of Total Sales p.a.	Trade Terms (Days)	Mode of Payment (Cheque, TT, LC, etc)
Santiparp Industries Co. LTD, Thailand	RBD Palm Olein	3	3	Advance	TT
Alsmo For Trading And Import, Yemen	RBD Palm Olein	5	1	Advance	TT
Dadiah General Trading, Yemen	RBD Palm Olein	5	1	Advance	TT
Malaysia Vietnam Oil Co. LTD, Vietnam	RBD Palm Olein	4	1	Advance	TT
ATS, Mauritania	RBD Palm Olein	2	1	Advance	TT

- **Local Sales:** 13%.
- **Export Sales:** 87%
- Credit terms granted is in the range of 30 days to 120 days depending on the relationship/volume/country. New buyers or smaller players are granted shorter terms or advance payment.
- Payments are collectable thus far. No bad debts written off in FY 2024 and FY 2025.

Purchases/Major Suppliers

Supplier(s)	Product(s)	Dealing (Years)	% of Total Purchases p.a.	Trade Terms (Days)	Mode of Payment (Cheque, TT, LC, etc)
Ngo Chew Hong Oils & Fats Sdn Bhd (Mewah Group)	RBD Palm Olein	>6	5	Advance	TT
Berkat Oil Palm Sdn Bhd	RBD Palm Olein	>2	4	Advance	TT
Wilmar Palm Products Sdn Bhd	RBD Palm Olein	>5	3	Advance	TT
PGEO Edible Oils Sdn Bhd	RBD Palm Olein	>7	3	Advance	TT
Fgv Iffco Sdn. Bhd.	RBD Palm Olein	>4	2	Advance	TT

- **Local Purchases:** 90%.
- **Importation: 10%** (China, Argentina)

i) 90% of raw materials i.e. palm oil is locally sourced and a minimal of 10% of raw materials are imported such as sunflower oil, cotton seed oil, canola oil, spices and etc.
ii) Approximately 30% of overall purchases is derived from Mewah Group. Business relationship with Mewah Group has been established for more than 7 years. Furthermore, Mewah Group is also EXIM Bank's Customer since 2015 which added comfort to us.

5. RATIONALE

REQUEST 1
Additional SF-i 3 Facility of RM40.0 Million

BD recommends an additional RM40.0 million under SF-i 3, increasing the facility limit from RM40.0 million to RM80.0 million, based on the following considerations:

i. Enlarged Trade Cycle and Working-Capital Requirement

Based on the FY2025 audited accounts, the Customer's working-capital requirement is estimated at RM325.9 million. The assessment reflects annual cost of goods sold of RM793.1 million and a 150-day financing cycle, as set out below:

Working Capital Financing Position – FY2025 (Draft Audited)	**RM'000**
Sales	828,690
COGS (95.7% of Sales)	793,056
Cash cycle (financing tenor, days)	150
Working capital requirement [COGS x 150 days / 365 days] (A)	325,914
Less: Existing total working capital financing limits (EXIM & other banks/FIs) (B)	(258,000)
Shortfall before additional financing (A – B)	67,914
Less: Proposed additional SF-i 3 financing (C)	(40,000)
Residual shortfall after additional financing (A – B – C)	**27,914**
Revised total working capital financing limit (B + C)	*298,000*

The additional RM40.0 million would increase total working-capital facilities to approximately RM298.0 million and reduce the financing shortfall from RM67.9 million to RM27.9 million. This will provide additional headroom to fund purchases from local palm oil suppliers, which are generally settled on cash-on-delivery terms, while awaiting export proceeds. The requirement is particularly relevant for Middle East shipments, where collection timing has been affected by the ongoing regional crisis.

The 150-day financing tenor is supported by the Customer's actual net operating cycle of 144 days, with a modest six-day buffer:

Actual Operating Cycle	**Days**
(+) Average inventory holding period	9
(+) Average production period	15
(+) Average collection period	56
(+) Shipment lead time to overseas markets (average)	75
Less: Average payables period	(11)
Net operating cycle	**144**

Sea-shipment lead times of 30 to 90 days to the Middle East, Africa, Turkey, Canada and Australia, together with slower collections from certain Middle East buyers, continue to lengthen the trade cycle and place pressure on cash flow. The proposed financing tenor is therefore consistent with the Customer's underlying operating cycle.

ii. Satisfactory Facility Conduct and Repayment Record

SF-i 3 has been satisfactorily conducted, with RM39.98 million of the 2025 drawdowns fully repaid. Four bills were settled one day after maturity in March 2026 because funds were transferred after the operational cut-off time. The delay was administrative rather than credit-related, and there has been no recurrence since April 2026.

iii. Strong Repayment Capacity for the Enlarged Facility

Repayment capacity remains strong. Under the base-case cash-flow projection, the financing service coverage ratio ("FSCR") is 5.72 times in FY2026 and improves to 8.22 times by FY2029. Under the sensitised scenario, which assumes a 50% reduction in sales volume, FSCR remains between 4.13 times and 5.18 times, supported by free cash reserves of RM69.1 million to RM77.6 million. These buffers indicate sufficient capacity to service the enlarged facility under both the base and downside cases (refer to the Payment Ability section).

iv. Facility Structure and Risk Mitigant

Buyer-payment risk is mitigated by the use of "Documents Against Payment" terms, under which buyers are required to settle in full before the goods or shipping documents are released, as confirmed by TID during the meeting with the Customer on 5 May 2026.

RBD palm olein is a staple commodity with established demand and a liquid secondary market. CPO prices strengthened to RM4,499 per metric tonne in May 2026, representing a 16% year-on-year increase, supported by higher biodiesel demand amid the Middle East crisis. The marketability of the underlying goods provides an additional exit route should liquidation be required.

The facility is self-liquidating and supported by identifiable trade transactions. Each drawdown is made against confirmed purchase orders, sales contracts or invoices and is supported by the relevant shipping documents. Each bill is retired upon receipt of the corresponding buyer proceeds, providing transaction-level control over utilisation and repayment.

An additional upfront cash deposit of RM4.0 million, equivalent to 10% of the additional limit, will be placed upon approval. This will increase the total upfront cash deposit for SF-i 3 to RM8.0 million, representing 10% of the enlarged RM80.0 million facility limit. Together with the progressive sinking-fund build-up and the existing guarantees, this provides further cash-collateral support and strengthens the Bank's risk position.

REQUEST 2

Reinstatement of Original Pricing of COF+2.75% For SF-i 3

As per the SLO dated 05/01/2026, EXIM Bank had revised the pricing of SF-i 3 from COF+2.75% to COF+3.50% due to the delay in executing the redemption of the Affin Bank facility as required under the Conditions Precedent. With the Affin Bank facility since fully redeemed, all Conditions Precedent have been complied with, and BD deems the request for reinstatement of the original pricing to be acceptable.

REQUEST 3

Waiver of the Conditions Subsequent of SF-i 3, SF-i 4, SF-i 5 and RC-i in Respect of (i) the Banking Facilities Consolidation Advice and (ii) the Trade Credit Takaful/Insurance Coverage Requirement.

Waiver of the banking facilities consolidation requirement

i. The condition only requires that "the Bank shall advise the Customer" to consolidate a portion of its facilities and was framed as a relationship-building recommendation rather than a binding, risk-mitigating covenant.

ii. In addition to the satisfactory conduct of its EXIM Bank facilities (as highlighted under Request 1), the Customer's facilities with other banks/FIs are promptly serviced, with no arrears recorded over the past twelve (12) months as per the latest CCRIS Report.

iii. Consolidating other banks' facilities into EXIM Bank would erode the Group's SCEL headroom (Group exposure of RM212.26 million against the RM261.097 million benchmark) and heighten single-Customer concentration risk.

iv. The Customer's net working capital requirement continues to expand in tandem with its growth. Against projected sales recovering to RM1.17 billion in FY2027 (per the cash flow projection under the Payment Ability section), trade receivables alone would approximate RM141 million at the historical 44-day collection period, a scale that prudently warrants diversified banking lines across multiple institutions.

Waiver of the Trade Credit Takaful/Insurance requirement

As confirmed by TID at the meeting held with the Customer on 05/05/2026, the Customer does not require any Trade Credit Takaful for the existing transactions financed by EXIM Bank as all of its sales are conducted on "Documents Against Payment" terms, under which buyers can only collect their orders upon full settlement, the same structural mitigant highlighted under Request 1.

Hence, the buyer payment risk that this condition was intended to cover is already structurally mitigated under the current trade terms, and the Customer is seeking EXIM Bank's consideration to waive this requirement.

REQUEST 4
Annual Review and Renewal of the Existing Facilities

The Annual Review was due on 27 June 2026, and an extension to 27 September 2026 was granted on 22 July 2026. Premised on the satisfactory conduct and full utilisation of the facilities as detailed below, BD is proposing renewal for a further year, with the next Annual Review due on 27 June 2027.

Facility	Approval Level	1st Drawdown	Average Utilisation
SF-i 1 (RM10.0 million)	Approved by the BOD on 27 June 2023 based on the recommendation of the BCC and MCC on 13 June 2023.	2 November 23	100%

SF-i 2 (RM30.0 million)	Endorsed by the BCC on 9 July 2024 based on the MCC's approval on 4 July 2024.	30 September 24	100%
SF-i 3 (RM40.0 million)	Endorsed by the BCC on 24 July 2025 based on the MCC's approval on 15 July 2025.	16 October 25	100%
SF-i 4 (RM5.0 million)		29 June 26	100%
SF-i 5 (USD3.0 million)		6 August 26	100%
RC-i (RM5.0 million)		30 July 26	100%

The COD Reports covering the period up to 31 July 2026 revealed the following:

Item	SF-i 1	SF-i 2	SF-i 3	SF-i 3
Total disbursement	RM33,842,279.22 (2025) RM15,857,098.87 (YTD July 2026)	RM119,670,730.46 (2025) RM58,153,087.88 (YTD July 2026)	RM39,976,432.55 (2025) RM39,822,432.01 (YTD July 2026)	RM0 (2025) RM5,000,000.00 (YTD July 2026)
Total repayment	RM33,838,477.42 (2025) RM19,973,238.42 (YTD July 2026)	RM113,470,787.66 2025) RM59,876,135.45 (YTD July 2026)	RM0 (2025) RM40,794,333.15 (YTD July 2026)	RM0 (2025) RM0 (YTD July 2026)
Total profit received	RM398,291.58 (2025) RM470,736.60 (YTD July 2026)	RM1,587,082.16 (2025) RM1,811,948.29 (YTD July 2026)	RM0 (2025) RM1,218,525.21 (YTD July 2026)	RM0 (2025) RM0 (YTD July 2026)
No of transactions recorded	86 (Year 2025) 27 (YTD May 2026)	327 (Year 2025) 89 (YTD May 2026)	27 (Year 2025) 38 (YTD May 2026)	27 (Year 2025) 4 (YTD May 2026)
Delay payment	No	Yes	Yes	No
Overdue	No	No	No	No
Watchlist	No	No	No	No

Key comments from COD Report:

i. The Customer shows a trend of active re-utilization of facility upon settlement of existing financing.

ii. All security is intact.

iii. There were 11 overdue bills recorded for the period under review under SF-i 2 while 4 overdue bills under SF-i 3, as detailed below:

No	Financing No. (SF-i 2)	Maturity date	Payment received date	Amount (RM)
1	AGRO2 0349	15/09/2025	12/09/2025 & 17/09/2025	164,388.00
2	AGRO2 0350	15/09/2025	17/09/2025	444,000.00
3	AGRO2 0357	15/09/2025	17/09/2025	553,201.00
4	AGRO2 0376	16/01/2026	14/01/2026 & 19/01/2026	166,800.00
5	AGRO2 0377	16/01/2026	19/01/2026	343,201.00
6	AGRO2 0378	16/01/2026	19/01/2026	145,600.00
7	AGRO2 0379	16/01/2026	19/01/2026	144,279.00
8	AGRO2 0380	16/01/2026	19/01/2026	1,162,005.00
9	AGRO2 0381	16/01/2026	19/01/2026	144,402.00
10	AGRO2 0438	09/03/2026	06/03/2026 & 10/03/2026	2,083,100.00
11	AGRO2 0439	09/03/2026	10/03/2026	1,368,844.00

No	Financing No. (SF-i 3)	Maturity date	Payment received date	Amount (RM)
1	AGRO3 0003	16/03/2026	17/03/2026	387,960.43
2	AGRO3 0004	16/03/2026	17/03/2026	411,496.00
3	AGRO3 0005	16/03/2026	17/03/2026	2,346,532.80
4	AGRO3 0006	16/03/2026	17/03/2026	1,481,713.20

Note: LU has engaged the Customer on the overdue bills under SF-i 2 and SF-i 3. The delays were confirmed to be an operational timing matter (funds transferred past the cut-off time) rather than a credit concern. Following LU's reminders, the Customer has tightened its payment operations, with no recurrence since April 2026.

i. Most applications were financed based on scanned copies of the Transaction Documents (i.e. Application Form, Notice of Disbursement and ITF forms). However, despite TU's continuous follow-up, the original ITF documents were occasionally submitted beyond the 7 working days required under the LO.

LU has put the Customer on notice that this must not recur. The Customer has acknowledged the operational shortcoming and committed to rectify it, and TU will continue to monitor the timely submission of the original documents at each drawdown.

ii. All disbursements were made on a reimbursement basis, whereby the invoices submitted had already been paid by the Customer to their suppliers in accordance with the sales contracts. However, despite TU's previous requests, the Customer did not submit the relevant sales contracts for our reference.

As per discussion with TU, the Sales Contract is not required for disbursement as per the LO. However, as the invoice and bank statement make reference to Sales Contract, moving forward, TU will require the Sales Contract to be submitted as a countercheck against the invoice and bank statement, and BD will formally notify the Customer that this is a requirement for all future disbursements.

Conditions Precedent Update

All CPs have been fulfilled.

Conditions Subsequent Update

Facility	Conditions Subsequent	Status
SF-i 3, 4, 5 RC-i	i. The Bank shall advise the Customer to consolidate a portion of banking facilities maintained with other banks and/or Financial Institutions. ii. Keyman Takaful (priority)/ Insurance under Mr. Paramjit Singh A/L Darshan Singh with sum insured at least RM10.0 million iii. Trade Credit Takaful (priority)/ Insurance to cover at least a portion of the Buyer's payment risk (whichever is acceptable by EXIM Bank). iv. Appointment of a Tier 1 Auditor (as defined by the Bank) within 2 years.	i. Mr Paramjit has started the application process for the Keyman Takaful for coverage of RM10 million with AIA. The policy has been inforced in August 2026 and in the process of completing the absolute assignment documentation. ii. On the appointment of Tier 1 Auditor, the process is ongoing; the fees surveyed to date are on the high side at a time when the Customer is facing operational and cash flow strain from the Middle East crisis. The Customer will revisit the appointment in 2027 once its operations and cash flow have stabilised. iii. On the consolidation of banking facilities and the Trade Credit Takaful coverage, refer to Request 2, under which the Customer is seeking a waiver of these conditions.

6. FINANCIAL PERFORMANCE

The Customer has changed the auditor from Chook & Co. (AF1339) to Sylvester Anthony & Co (AF 0844) due to rising audit fee issue. Due to the change of auditor, the Customer has sought an extension from SSM for submission of the audited accounts from 30 June 2026 to 30 September 2026. The request was lodged to and approved by SSM on 30 May 2026. The audited financial statements for FYE 31 December 2025, carrying an unqualified opinion dated 20 August 2026, form the basis of the analysis below.

Classification/ FYE	**Audited (Unqualified) 12 Months**	**Audited (Unqualified) 12 Months**	**Audited (Unqualified) 12 Months**	**Audited (Unqualified) 12 Months**	**Audited (Unqualified) 12 Months**

Based on FYE2025 (Audited)

Revenue & Profitability Analysis

Audited revenue rose 86.2% to RM828.7 million in FY2025, driven primarily by volume. AGB nearly doubled sales into its non-traditional export markets (Yemen, Lebanon, Jordan, Djibouti, Congo and Sudan), where limited competition from exporters willing to serve these destinations gives it a defensible position. Average CPO prices rose roughly 10% year-on-year (about RM4,600 per tonne in 2025 versus RM4,180 in 2024), implying volume growth approaching 70%. The expansion is therefore a shipment-volume story anchored in AGB's market access, not a price windfall.

This growth has outpaced AGB's trade finance capacity. The bank facility listing dated 5 June 2026 shows approved BA limits of RM258.0 million across nine banks at 99.5% utilisation (RM256.6 million drawn); following settlement and cancellation of the RM30.0 million Affin Bank line in July 2026, the available limit is RM228.0 million, which on the 150-day cycle supports approximately RM580 million of annual sales against RM828.7 million achieved. AGB is operating at the ceiling of its trade lines with no headroom for incremental business or contingency, which is the basis for the additional RM40.0 million sought under Request 1.

Gross profit grew 51% to RM35.5 million (FY2024: RM23.5 million) even as gross margin narrowed to 4.3% from 5.3%, with COGS at 95.7% of revenue. The margin compression reflects higher CPO input costs not fully passed through, owing to competitive pricing in export markets and timing mismatches between procurement and sales contracts. It is relative rather than absolute and consistent with a deliberate volume-led strategy; gross margin has held within 3.3% to 5.3% over the past five years.

PBT rose 47% to RM11.1 million (FY2024: RM7.6 million) and net profit 26% to RM7.1 million (FY2024: RM5.7 million). AGB has remained profitable in every year under review. Margins nonetheless thinned (PBT 1.3%, net 0.9%) because operating expenses rose 53% to RM17.3 million and finance cost rose 82% to RM9.7 million, equivalent to 87% of PBT. Finance cost is now the largest drag on profit and scales with the trade cycle of which sustaining profit growth therefore depends on margin retention and on funding the cycle efficiently through committed trade lines..

Asset & Liability Analysis

	FY2023 (Audited)	FY2024 (Audited)	FY2025 (Audited)
Total Assets	113,388	177,376	299,340
Total Liabilities	97,009	163,329	270,151
Shareholders' Fund	16,379	14,046	29,190
Paid-up Capital	2,000	7,000	15,000
Bank Financing	62,002	147,695	244,965
Cash / Bank Balances	21,449	67,927	104,198
Gearing (x)	3.79x	10.52x	8.39x
Net Gearing (x)	2.20x	6.05x	4.82x
Current Ratio (x)	1.17x	1.01x	1.09x
Amt Due to Directors	1,926	5,213	1,109
Inventory	6,347	12,615	11,643
Trade Debtors	72,902	53,560	98,650
Trade Creditors	16,285	4,792	17,979

Total assets grew 68.8% to RM299.3 million, almost entirely in trade receivables and cash, mirroring the RM828.7 million turnover. The growth was funded by bank borrowings (excluding leases), which rose to RM242.6 million from RM145.5 million on a net drawdown of RM96.3 million, taking total liabilities to RM270.2 million or 90.2% of total assets. The balance sheet is that of a trade-finance-dependent commodity exporter: short-cycle, self-liquidating assets funded by revolving lines.

Shareholders' fund more than doubled to RM29.2 million (FY2024: RM14.0 million) on a further RM8.0 million capital injection (paid-up capital now RM15.0 million) and full retention of the RM7.1 million net profit, with no dividend paid. This reverses the FY2024 equity extraction and demonstrates shareholder commitment to funding the growth alongside the banks.

Gearing improved to 8.39x (FY2024: 10.52x) and net gearing to 4.82x (FY2024: 6.05x) on the higher equity base and cash and bank balances of RM104.2 million. Of this, RM43.0 million (41%) is pledged fixed deposits and cash collateral, and the facility listing dated 5 June 2026 records RM45.2 million of deposits and sinking-fund balances that will continue to build under the contractual mechanisms. Free cash is therefore materially lower than the headline and gearing remains high; the trend is improving, but deleveraging depends on profit retention.

Trade debtors rose to RM98.7 million (FY2024: RM53.6 million), in line with revenue, with collections steady at 43 days. Trade creditors recovered to RM18.0 million (FY2024: RM4.8 million), but at 8 days payable AGB continues to buy essentially on cash terms while extending 43 days of credit. This 35-day funding gap on RM828.7 million of sales is the structural driver of its working capital requirement.

Cash Flow Analysis

Efficiency Metrics	FY2023	FY2024	FY2025
Days Inventory	7	11	5
Days Trade Receivables	79	44	43
Days Trade Payables	19	4	8
Cash Cycle (days)	**67**	**51**	**41**
Net Cashflow from Operating Activities (RM'000)	**(13,276)**	**(17,848)**	**(66,810)**

The cash cycle shortened to 41 days (FY2024: 51 days), the most efficient in AGB's history, on lower inventory holding (5 days), steady collections (43 days) and partially restored supplier credit (8 days). Operationally, the working capital is being managed tightly. The additional funding need arises from scale, not slippage.

Net cash flow from operating activities was negative RM66.8 million (FY2024: negative RM17.8 million). Operations generated RM22.3 million before working capital changes, but receivables absorbed RM86.1 million as revenue nearly doubled, offset by only RM7.4 million of additional payables and RM1.0 million released from inventories, with RM9.7 million of interest and RM1.8 million of tax paid.

The deficit was funded by RM96.3 million of net bank drawdowns and the RM8.0 million equity injection. Cash and bank balances rose to RM104.2 million, but RM43.0 million of this is pledged (up RM18.5 million in the year) and the balance reflects pre-funding of the enlarged facility base rather than free cash generation. AGB is structurally cash-absorbing while it grows and depends on its RM228.0 million of trade lines revolving at near-full utilisation. With those lines already supporting less than the current turnover, the additional RM40.0 million SF-i 3 line is required to sustain existing volumes on committed terms rather than to fund further expansion.

Management Accounts – 6 Months Ended 30 June 2026

The Customer's unaudited management accounts for the six months ended 30 June 2026 ("6M FY2026") are summarised against the FY2025 audited position below:

RM'000	FY2025 (Audited)	6M FY2026 (Management)
Revenue	828,690	259,472
Gross Profit / Margin	35,528 / 4.3%	15,393 / 5.9%
Profit Before Tax / Margin	11,125 / 1.3%	1,729 / 0.7%
Trade Receivables	98,650	117,501
Inventories	11,643	27,729
Trade Payables	17,979	16,146
Cash, Bank & Fixed Deposits	104,198	91,930
Total Bank Financing	244,965	256,693
Shareholders' Fund	29,190	34,938
Gearing / Net Gearing (x)	8.39x / 4.82x	7.35x / 4.72x
Current Ratio (x)	1.09x	1.11x

Revenue for 6M FY2026 of RM259.5 million represents 31% of the FY2025 turnover and an annualised run-rate of approximately RM519 million, well below the flat RM828.7 million assumed for FY2026 in the cash flow projection. The slowdown is consistent with the delayed Middle East collections and the funding constraint described above, whereby near-full utilisation of trade lines caps the volume the Customer can ship.

Encouragingly, gross margin improved to 5.9% (FY2025: 4.3%) on a COGS ratio of 94.1%, indicating better cost pass-through in a softer CPO price environment. Nonetheless, finance charges of approximately RM6.5 million (2.5% of sales) absorbed most of the gross profit, leaving PBT of RM1.7 million (0.7% margin) against RM11.1 million for the full year FY2025.

It is worth to note that the Customer confirms that the orders have been picked up and increase drastically due to pent up demand since the start of 2H 2026 and the Customer expects to hit revenue of at least RM800 million by year end.

The balance sheet shows continued working capital build-up despite lower sales. Trade receivables rose to RM117.5 million (FY2025: RM98.7 million), equivalent to approximately 82 days of 6M FY2026 sales (FY2025: 43 days) and inventories more than doubled to RM27.7 million (approximately 21 days), while trade payables contracted to RM16.1 million.

The debtors ageing as at 30 June 2026 shows RM43.3 million (37%) outstanding beyond three months (30 April 2026: 34%), reflecting the delayed collections from Middle East buyers. Total bank financing increased to RM256.7 million (FY2025: RM245.0 million), including RM20.0 million under the Affin Bank trade line that was subsequently settled in July 2026 while cash, bank and fixed deposit balances declined to RM91.9 million of which approximately RM49.8 million is held as fixed deposits, sinking funds and deposits pledged to financiers.

Shareholders' fund of RM34.9 million as at 30 June 2026 comprises share capital of RM15.0 million, retained earnings of RM18.2 million and the RM1.7 million half-year profit. The gearing is approximately 7.35x, an improvement from FYE2025's level of 8.39x..

Overall, the 6M FY2026 results reaffirm that the Customer remains profitable but capacity-constrained, with liquidity reliant on the continued revolving of trade lines and the timely recovery of the overdue Middle East receivables.

Working Capital Requirement

Net working capital requirement and the actual operating cycle are as follows:

FYE	**FY 2024**	**FY 2025**
	Audited	**Audited**
Sales (RM'000)	445,106	828,690
COGS (%)	94.72%	95.7%
Cash cycle (Days)	150	150
Working capital requirement (RM'000)	173,262	325,914
(-) Existing working capital limit (RM'000)	151,100	228,000
Net Working Capital Requirement (RM'000)	**22,162**	**97,914**

Notes:

i. Sales and COGS are as per the audited accounts for FY2025.

ii. Cash cycle is based on the financing tenor and the actual operating cycle with minimal buffer period of 6 days as tabulated below.

iii. Existing working capital financing limit with EXIM Bank and other banks/FIs (excluding the Affin Bank facility of RM30.0 million, which has since been fully settled and cancelled per Affin Bank's letter dated 23 July 2026). On the pre-cancellation limit of RM258.0 million, the net shortfall would have been RM67.9 million (RM27.9 million after the proposed additional financing).

Actual operating cycle is as follow:

Average Inventory Holding Period [12 days (FY 2022), 7 days (FY 2023), 11 days (FY 2024), 5 days (FY2025)]	9 days
Add: Average Production Period	15 days
Add: Average Collection Period of up to 60 days [59 days (FY 2022), 79 days (FY 2023), 44 days (FY 2024), 43 days (FY2025)]	56 days
Add: Shipment lead time to overseas Sea shipping period from Malaysia (Port Klang) to Middle East, Africa, Turkey, Canada, Australia is within 30 to 90 days. Whilst shipment to China, India, Vietnam and Thailand is within 30 to 60 days depending on the type of sea freight. BD is considering average shipment period of 75 days.	75 days
= Operating Cycle	155 days
Less: Average Payables Period [i.e. 12 days (FY 2022), 19 days (FY 2023), 4 days (FY 2024), 8 days (FY2025)]	11 days
Net Operating Cycle	**144 days**

The Customer therefore remains short of RM97.9 million in working capital financing and must preserve cash to fund purchases ahead of bill maturities. The additional RM40.0 million SF-i 3 sought under Request 1 partially bridges this shortfall and supports the current RM828 million turnover without over-reliance on pledged-deposit support.

For the business to be sustainable over the long run, the following need to be achieved:

i. Gross profit margin defended at or above circa 4.5% against a breakeven gross margin of approximately 3.0% at the FY2025 cost base, every 0.5% of margin equates to roughly RM4.1 million of PBT;

ii. RM228.0 million of trade lines (post-Affin cancellation) can support only around RM580

iii. Continued full profit retention and progressive equity build-up to bring net gearing below 5.0x and reduce dependence on pledged-deposit support;

iv. Collections held within the 60-day financing terms with no material ageing deterioration;

v. Net Cashflow from Operating Activities trending towards positive as growth normalises will be the clearest single indicator that the expansion has reached self-funding scale.

Ageing Analysis

Debtors Ageing Listing as of 30 June 2026

Debtors ageing	Current	<1 month	1 month	2 months	3 months	Older	Total
RM'000	46,116	12,582	6,522	9,017	16,908	26,357	117,501
%	39%	11%	6%	8%	14%	22%	100%

i. 63% of debts (RM74.2 million) are aged within 90 days, with 50% (RM58.7 million) current or less than one month overdue, indicating that collections for the bulk of the receivables book remain current.

ii. The remaining 37% (RM43.3 million) of debts aged 3 months and above (30 April 2026: 34%, RM29.4 million) are mostly owing from overseas buyers in the Middle East, whose payments have been delayed by the recent Middle East crisis. Seven debtors account for RM26.7 million, or approximately 62% of this bucket, mainly comprising amounts due from:

a) Adum Kabari General Trading LLC amounting to RM6.4 million (15%)
b) Dadiah General Trading amounting to RM4.7 million (11%)
c) Al Wagih Import And Commercial amounting to RM4.4 million (10%)
d) Pinnacle Foods (M) Sdn Bhd amounting to RM3.5 million (8%)
e) AGI amounting to RM3.0 million (7%) relating to the supply of raw materials, i.e. plastic resins.
f) Santiparp Industries Co Ltd amounting to RM2.4 million (5%)
g) Barcelona Enterprise Limited amounting to RM2.4 million (5%)

iii. As informed by Customer, prior to 2025, the plastic resins were purchased by AGB and thereafter supplied to AGI for jerry can manufacturing given AGI has yet to register as a plastic resins buyer for SST purposes. Nonetheless, from 2025 onwards, plastic resins are purchased directly by AGI.

iv. Debts are collectable thus far, with no bad debts or impairment reported over the past 3 years ended FY 2025 per the audited accounts. Nonetheless, given that RM29.4 million (34%) of receivables have been outstanding for 4 months and above, well beyond the average debtor period of 43 days, recoverability of the Middle East accounts should be closely monitored. As of now, payment of due bills with EXIM bank and other banks have been prompt based on latest CCRIS report.

v. The average debtor period is healthy at 43 days (i.e. less than 2 months) as per the Audited Report FYE 31 December 2025.

Creditors Ageing Listing as of 30 June 2026

Creditors ageing	Current	<1 month	1 month	2 months	3 months	Older	Total
RM'000	16,154	1,388	(3,788)	(462)	521	2,333	16,146
%	100%	9%	-23%	-3%	3%	14%	100%

i. Payment to suppliers is healthily conducted with over 85% of the RM16.1 million payables current or less than one month overdue (the negative balances in the 1–2 months buckets represent unallocated payments/credit notes) as most of their raw materials are commodities such as refined palm oil which is unlikely to have long credit terms granted by suppliers.

ii. Noted debts of RM9.28 million are owing to related company, AGI, of which RM3.0 million is due more than 3 months and represents substantially all of the amount outstanding in that bucket (RM2.85 million net).

iii. The average payable period is merely 8 days as per the Audited Report FYE 31 December 2025.

7. PAYMENT ABILITY

Primary Source of Payment ("PSOP")

Cash Flow Projection (Base-Case)

Cash flow projection in Annual Review 2025 vs Actual FYE2025's figures

During the Annual Review 2025, sales for FY 2025 were projected at RM820.0 million with a projected FSCR of 1.31x. Based on the Audited Report FYE 31 December 2025, the Customer achieved actual sales of RM828.7 million i.e. 101% of the projected sales (representing a growth of 86.2% from FY 2024's sales of RM445.1 million), evidencing the materialisation of its expansion plans and milestones.

However, the actual COGS margin of 95.7% was higher than the 94.5% assumed in the projection, resulting in an EBITDA margin of 2.4% which is lower than the projected operating surplus of 3%.

Premised on the above, the cash flow projection has been rebuilt using the FY 2025 actual results as the base year, with progressive normalisation of the cost structure, for FY 2026 till FY 2029.

PROJECTED CASHFLOW (RM'000)		Year 2025 (Actual)	Year 2026	Year 2027	Year 2028	Year 2029
Average Selling price of CPO (Per MT)		4.24	4.40	4.45	4.00	4.00

Assumptions

1. Average selling price for the CPO is assumed at RM4,400/MT for FY 2026 and RM4,450/MT for FY 2027 before normalising to RM4,000/MT for FY 2028 and FY 2029 as a conservative measure.

   Based on Kenanga Investment Bank Berhad's research dated 12 June 2026, CPO prices are expected to average at RM4,400 per tonne in 2026 and RM4,450 per tonne in 2027, supported by the price premium enjoyed by palm oil over competing vegetable oils. (Source: Focus Malaysia published on 12 June 2026 - https://focusmalaysia.my/kenanga-raises-cpo-price-forecast-as-tight-supply-el-nino-risks-persist/)

2. Sales assumptions are premised on the FY 2025 actual results as the base year.

   For the current projection, the FY 2025 actual sales serve as the base year with sales conservatively held flat (0% growth) in FY 2026 in view of the ongoing Middle East conflict which has disrupted shipments to and delayed collections from key export markets before recovering by 40.9% in FY 2027, tapering to 25.5% in FY 2028 and 10% in FY 2029 as the base enlarges translating to projected sales of RM828.7 million in FY 2026 rising to RM1.61 billion in FY 2029.

   The projected recovery growth from FY 2027 is deemed supportable considering the Customer has registered annual sales growth ranging from 21.3% to 101.3% over the past 4 years (FY 2022: 21.3%; FY 2023: 101.3%; FY 2024: 31.7%; FY 2025: 86.2%).

3. LU has projected the total cash outflow at between 97.56% of sales in FY 2026 and 96.06% in FY 2029 with the COGS ratio assumed to step down progressively from 94.5% of sales in FY 2026 to 94.0% in FY 2027, 93.5% in FY 2028 and 93.0% in FY 2029 on the back of economies of scale from the enlarged sales base whilst other operating expenses are maintained at 3.06% of sales.

Accordingly, the operating surplus is projected to widen from 2.44% of sales in FY 2026 to 3.94% in FY 2029 against the Customer's actual FY 2025 EBITDA margin of 2.4% which was dampened by the elevated COGS of 95.7%. Any payment shortfall is further mitigated by the FSRA, the Security Deposit and cash collateral build-ups and the EXIM sinking funds as highlighted in the Conclusion below.

4. The additional SF-i 3 of RM40.0 million is assumed to be fully released in October 2026 (the original SF-i 3 of RM40.0 million having been disbursed since October 2025) while SF-i 4, RC-i and SF-i 5 are assumed to be disbursed in July 2026. The Affin Bank facilities which have been fully settled and cancelled, are excluded from the commitments.

Conclusion

Based on the cash flow projection (base-case scenario) with the FY 2025 actual results as the base year and FY 2026 till FY 2029 projected, the FSCR stands at 5.72x in FY 2026 (easing marginally to 5.37x in FY 2027) before strengthening progressively to 8.22x by FY 2029 on a free-cash basis (8.15x to 11.34x on a gross basis including pledged cash) remaining comfortably above 1.0x throughout the projection period.

The coverage is anchored by the Customer's free cash reserves which are projected to build up from RM87.7 million in FY 2026 to RM159.6 million by FY 2029 with the cash flow remaining in surplus after financing in every year (RM46.9 million in FY 2026, RM8.7 million in FY 2027, RM25.1 million in FY 2028 and RM38.0 million in FY 2029) against annual commitments of RM18.59 million in FY 2026 and RM22.08 million per annum thereafter (after excluding the Affin Bank facilities which have been fully settled and cancelled)

It is further supported by the operating surplus which widens from RM20.2 million in FY 2026 to RM63.5 million in FY 2029 and on its own covers 1.09x to 2.87x of the annual commitments. This reflects that the Customer has sufficient funds to meet the commitments. Furthermore, all existing facilities are promptly paid as per the latest CCRIS Report.

Cash Flow Projection (Sensitised Analysis)

			Year 2025 (Actual)	Year 2026	Year 2027	Year 2028	Year 2029

Assumptions

1. Sales volume for FY 2026 till FY 2029 is sensitised lower by 50% as compared to the base-case scenario, with CPO prices unchanged. This translates to sensitised sales at half the base-case volume across FY 2026 to FY 2029.

2. Notwithstanding the lower volume, debt service is conservatively held at the full contractual level i.e. all facilities are assumed to remain fully utilised with no scaling down of the commitment charges, such that the revenue shock is not cushioned by lower financing costs. Total annual commitments therefore remain at RM18.59 million in FY 2026 (pro-rated for the drawdown timing) and RM22.08 million per annum thereafter, as per the base-case scenario.

3. Cash outflow ratios remain as per the base-case scenario, i.e. the COGS ratio stepping down from 94.5% to 93.0% of sales across FY 2026 till FY 2029 and other operating expenses at 3.06% of sales.

Conclusion

Based on the sensitised analysis, the FSCR stands at 5.18x in FY 2026, moderating to 4.13x in FY 2027 and FY 2028 before recovering to 4.41x by FY 2029 on a free-cash basis (6.95x to 7.61x on a gross basis including pledged cash), remaining comfortably above 1.0x throughout the projection period even with sales volume halved and debt service held at the full contractual level.

Nonetheless, the sensitised operating surplus (RM10.1 million in FY 2026 rising to RM31.7 million in FY 2029) trails the annual commitments of RM18.59 million to RM22.08 million per annum in the earlier years with the modest deficits after financing of RM8.4 million in FY 2027 and RM0.1 million in FY 2028 (before returning to a surplus of RM6.3 million in FY 2029). The deficits will be bridged by the free cash reserves which remain robust at between RM69.1 million and RM77.6 million throughout the projection period even should sales volume underperform by 50%.

This is mitigated by the FSRA, the sinking fund build-ups and pledged deposits which remain available as a final buffer against any payment shortfall.

Second Source of Payment ("SSOP")
Our existing and proposed Facilities i.e. SF-i 1, SF-i 2, SF-i 3, SF-i 4 and RC-i under RM currency totalling RM130.0 million and SF-i 5 under USD currency of USD3.0 million respectively are secured against cash collaterals with overall security coverage of 30%.

Final Source of Payment ("FSOP")
FSOP is from the directors' Joint and Several Guarantee by Mr. Azhanudin Shah Bin Azman and Mr. Paramjit Singh A/L Darshan Singh. Based on the Networth Declaration Form attested by Commissioner of Oath dated 19 June 2026, the total networth declared by Mr. Azhanudin Shah Bin Azman and Mr. Paramjit Singh A/L Darshan Singh are RM24.6 million and RM18.08 million respectively.

8. RISKS & MITIGATIONS	
Volatile Raw Material Price	RBD Palm Olein is the main raw material for AGB and CPO prices have risen to RM4,499/MT in May 2026 (+16% YoY) with a strong El Niño risk emerging that could further tighten supply into 2027 (Kenanga Research; MBSB Research, June 2026).

	This risk is mitigated as most of AGB's sales are backed by confirmed orders quoted on prevailing market palm oil prices, enabling incremental costs to be passed on to buyers. Gross profit margin has held within 3.3% to 5.3% across the past five financial years ended FY 2025 (FY 2025: 4.3%) despite price volatility.
Foreign Exchange Risk	Foreign exchange risk exposure is low as more than 85% of the business is export sales whilst importation is minimal at approximately 10% only. In addition, the SF-i 5 of USD3.0 million provides a natural hedge as USD-denominated supplier payments are matched against AGB's USD export proceeds.
Payment Risk/ Country Risk	AGB supplies to Yemen, Congo and Vietnam which are categorized under high-risk countries by our Bank. However AGB's export sales are conducted on Documents Against Payment terms which buyers can only collect their orders upon full settlement in addition to advance payments requested prior to shipment. Nonetheless, collections from Middle East buyers have been delayed by the recent crisis with RM29.4 million (34% of trade receivables as of 30 April 2026) aged 4 months and above and under active recovery monitoring while 66% of receivables (RM57.1 million) remain regularized within 90 days against an average debtor period of 43 days.
Supply and Demand Risk	Demand risk is low as AGB is involved in the wholesale of palm oil/vegetable oil (cooking oil products), a necessity for human consumption with global fats and oils consumption projected to grow through 2030 and the largest volume growth expected in AGB's core Asian markets (S&P Global, December 2025). On the supply side, the emerging strong El Niño could tighten CPO availability into 2027. This is mitigated by AGB's multiple trade lines for inventory financing and its confirmed-order sales model.

SWOT Analysis

Strength	Weakness
• Business has been growing and expanding to new countries over the past financial years, with sales growing at a 4-year CAGR of 56.4% from RM138.5 million in FY 2021, rising to RM167.9 million in FY 2022, RM337.9 million in FY 2023 (+101.3%), RM445.1 million in FY 2024 (+31.7%) and RM828.7 million in FY 2025 (+86.2%, Audited), surpassing the RM820.0 million projected during the Annual Review 2025 with PAT of RM7.1 million. • Strong management team with more than 10 years' experience in the palm oil industry.	• Negative NOCF over the past financial years (FY 2025: -RM66.8 million) as working capital expands in tandem with the Customer's rapid growth with the shortfall supported by bank financing. • Furthermore, the directors' advances have been consistently maintained in the account over the past financial years.

Opportunity	Threats
• Vast business opportunities to grow further, with the largest global consumption growth in fats and oils expected in South-eastern Asia, Southern Asia and mainland China through 2030 (S&P Global, December 2025) i.e. the markets on which AGB's expansion is focused. • Palm oil (cooking oil) remains a daily necessity for human consumption and demand will increase in tandem with the growing global population.	• Volatile commodity prices, with a strong El Niño risk emerging that could reduce harvests and lift CPO prices into 2027. • Mitigated by confirmed-order pricing that enables cost pass-through (refer to Risks & Mitigations). • Prolonged payment delays from buyers in conflict-affected markets (34% of receivables aged 4 months and above as of 30 April 2026) also warrant continued monitoring.

9. MARKET OUTLOOK

Global Demand and Supply Backdrop

Global consumption of fats and oils is projected to grow at a moderate rate over 2025–2030, led by soybean oil and palm oil. Food uses will continue to dominate overall demand supported by population growth and rising living standards in developing nations and the largest volume growth is expected in South-eastern Asia, Southern Asia (especially India) and mainland China i.e. the markets on which AGB's expansion is focused.

On the supply side, South-eastern Asia remains the centre of global production, accounting for more than a third of global output in 2025 given its dominant role in palm and palm kernel oil processing, followed by Latin America (the world's largest source of soybean oil), mainland China and Europe (the leading producer of rapeseed oil). Industrial demand will meanwhile depend largely on the direction of biofuels legislation. (Source: S&P Global, Chemical Economics Handbook – Fats and Oils Industry Overview, December 2025)

Malaysian Palm Oil Market

The Malaysian palm oil market remains supportive, with key May 2026 indicators as follows:

- **CPO price:** strengthened from RM4,019 per MT in January 2026 to RM4,499 per MT in May 2026 (+16% YoY), underpinned by higher bio-diesel demand following the Middle East conflict.

- **Production:** 1.516 million MT in May 2026 (-14% YoY), below the 10-year average for the month, although cumulative January–May 2026 output of 7.385 million MT ran 1.5% above both last year and the 10-year average.

- **Exports:** soft at 1.106 million MT (-20% YoY) as buyers front-loaded purchases of Indonesian palm oil ahead of Indonesia's transition to a centralised export body in 2HCY26

- **Inventory:** lifted to a near 10-year high of 2.428 million MT (+22% YoY), with the stock/usage ratio rising to 14.0% (April 2026: 11.5%).

Although fertiliser and energy costs have risen, upstream planters are still expected to be net beneficiaries of the conflict-driven price environment. With rising bio-diesel demand and the growing risk of a severe El Niño, Kenanga Research expects prices for edible oils, including palm oil, to remain supportive into 2HCY26 and potentially into CY27, and has raised its average CPO price forecast to RM4,400 per MT for CY26 (CY27: RM4,450 per MT) with an OVERWEIGHT call on the sector. (Source: Kenanga Research, Plantation Sector Update, June 2026, as reported by Focus Malaysia on 12 June 2026)

Outlook for AGB

With the positive market outlook, coupled with an experienced management team, AGB is well positioned to further strengthen its global footprint and expand its clientele base across the world. The firm CPO price environment, reinforced by the emerging El Niño supply risks, also supports the CPO price assumptions adopted in the cash flow projection under the Payment Ability section.

10. RECOMMENDATION

In assessing the Requests, BD has considered the Customer's continued business expansion and the corresponding increase in working capital requirements. While the overall credit profile remains acceptable, the following key considerations will continue to be monitored through the COD reporting and annual review process:

i. Margin discipline

Gross profit margin is expected to be maintained at **not less than 4.5%**, providing an adequate buffer against the estimated FY2025 breakeven margin of approximately 3.0%. Given the scale of the Customer's revenue, preservation of margin remains important to sustaining profitability and internal cash generation.

ii. Growth aligned with funded capacity

The proposed increase in trade facilities is intended to better align the Customer's funding capacity with its expanded business volume. Based on the 150-day working capital cycle, the existing RM228.0 million trade lines (following settlement of the Affin Bank line) support approximately RM580 million of annual sales, compared with FY2025 revenue of RM828.7 million. The additional RM40.0 million will partially bridge this funding gap and support the higher level of business activity.

iii. Receivables discipline

Receivables are expected to remain broadly within the stipulated 60-day financing terms, with no material deterioration in ageing. This remains important in preserving the Customer's working capital cycle and liquidity position as the business expands.

iv. Progressive strengthening of capital and liquidity

Continued profit retention and internal cash generation are expected to progressively strengthen the Customer's equity base, reduce net gearing to below 5.0x over time and lessen reliance on pledged deposits and external financing as the business matures.

Taking into consideration AGB's strong business growth, improving financial performance, robust repayment capacity, expanding export footprint and positive contribution to the Bank, BD recommends the Requests for approval, based on the following key considerations:

i. Alignment with EXIM Bank's mandate and additionality

Supports a Malaysian company's export of palm-based cooking oil to established and non-traditional markets, including Djibouti, Congo, Lebanon, Yemen and Jordan, while facilitating further expansion into Africa.

ii. Strong growth with improving profitability

Revenue grew at a 4-year CAGR of 56.4% to RM828.7 million in FY2025 (Audited: +86.2% YoY), with PAT of RM7.1 million, demonstrating continued business growth while remaining profitable.

iii. Robust repayment capacity

Base-case FSCR is projected at **5.37x–8.22x** from FY2026 to FY2029 and remains at **4.13x or better** under a 50% sales-volume sensitisation, providing a strong buffer against downside risk.

iv. Strengthening liquidity position

Free cash reserves are projected to increase to RM159.6 million by FY2029, supported by pledged cash comprising upfront deposits, sinking funds and FSRA, which are projected to reach RM72.2 million by FY2029.

v. Profitable relationship for the Bank

SF-i 1 and SF-i 2 generated approximately RM2.0 million in profit in 2025, and SF-i 1, SF-i 2 and SF-i 3 together generated approximately RM3.5 million in the seven months to July 2026. At full utilisation of the renewed facilities, annual financing income is estimated at approximately **RM8.3 million** based on prevailing all-in rates.

vi. Positive industry outlook and market expansion

Demand for edible oils remains supported by population growth and sustained food consumption. AGB's expansion into Africa provides further growth opportunities while broadening its geographical market reach.

Salient Terms and Conditions

1. **Customer** : Agro 19 Berhad
2. **Facility Type & Amount** :

Facility	Existing (RM'000)	Changes (RM'000)	New Limit (RM'000)
Supplier Financing-i ("SF-i") 3 (Pre-Shipment)	RM40,000.00	+RM40,000.00	RM80,000.00
Total (RM)	RM40,000.00	+RM40,000.00	RM80,000.00

(hereinafter shall be referred to as "the Facility").

3. **Prevailing Profit Rate** : At the rate based on EXIM Bank's Cost of Fund-i ("COF-i") plus Two Point Seven Five Percent (2.75%) per annum.

   The COF-i which is EXIM Bank's financing cost shall either be based on Kuala Lumpur Interbank Offered Rate ("KLIBOR") or any other rate that is to be determined by EXIM Bank at its absolute discretion plus related cost of financing.

   Profits shall be chargeable at the Prevailing Profit Rate on the amount disbursed/utilized commencing from the date of each Disbursement/Utilization until maturity date and shall be calculated on the basis of actual number of days elapsed in a year of Three Hundred Sixty-Five (365) days.

4. **Purpose** : To finance the Supplier's Pro-forma Invoice, Sales Contract and/or Invoice for the purchase of raw materials including palm oil and other business related products.

5. **Margin of Financing** : Up to a maximum of One Hundred Percent (100%) of the Supplier's Pro-forma Invoice, Sales Contract and/or Invoice value.

6. **Availability Period** : Within a period of Twelve (12) months from the date of the Master Facility Agreement or such other date which shall be deemed to include any extension thereof made by EXIM Bank from time to time, provided that the first Disbursement/Utilization shall be made within Six (6) months from date of the Master Facility Agreement.

   Failure to make such Disbursement/Utilization shall entitle EXIM Bank to revoke/ withdraw from granting the Facility.

Any portion of the Facility not disbursed/utilized upon the expiry of the Availability Period shall be automatically cancelled unless otherwise previously extended in writing by EXIM Bank and shall not be available for further utilization by the Customer unless agreed by EXIM Bank and at the request of the Customer.

7. **Tenure** : Up to a maximum period of 150 days from the Disbursement/Utilization date.

The Facility shall be subjected to annual review at absolute discretion of EXIM Bank and payable on demand. If the Facility is recalled or terminated, the Customer is required to pay all outstanding amount immediately.

8. **Security(ies)** : The security(ies) for the Facility shall be as follows:

i. Cash Collateral Agreement is to be executed for Placement Upfront Cash Deposit of 10% of the SF-i 3 Facility Limit amounting to RM8,000,000.00 (comprising the existing RM4,000,000.00 and an additional RM4,000,000.00 for the additional limit of RM40.0 million) is to be remitted into EXIM Bank's account.

ii. Sinking Fund with the build-up amount of RM400,000.00 to be remitted into EXIM Bank's account on quarterly basis until the total build-up amount reaches RM8,000,000.00. The first build-up on the sum of RM400,000.00 is to commence six (6) months from the first Disbursement/Utilization date of the additional SF-i 3 Facility.

ii. Irrevocable, Unconditional, Joint and Several Guarantee ("JSG") by all directors namely:

a. Azhanudin Shah Bin Azman (NRIC: 680719015839)
b. Paramjit Singh A/L Darshan Singh (NRIC: 690502086387)

v. Such other security arrangement as advised by EXIM Bank's solicitors and to be mutually agreed upon between the Customer and EXIM Bank.

(collectively referred as "**Security Documents**")

9. **Facility Fee** : 0.5% of the additional Facility Limit of RM40.0 million shall be payable into EXIM Bank's MYR account upon the acceptance of the Supplemental Letter of Offer.

10. **Disbursement/Utilization** : Request for Disbursement/Utilization shall be made by the Customer by way of issuance of a Disbursement Notice at least **Seven (7) Business Days** or any other period specified by EXIM Bank prior to the intended Disbursement/Utilization date supported by documentary evidence satisfactory to EXIM Bank and compliance of Conditions Precedent as stated herein and/or in the Master Facility Agreement.

The Facility shall be disbursed/utilized:

i. Upon satisfactory completion of all documentation and fulfilment of all Conditions Precedent for Disbursement/Utilization to EXIM Bank's satisfaction;

ii. Request for Disbursement/Utilization shall be supported by documentary evidence satisfactory to EXIM Bank;

iii. The Customer shall submit/receive the following transaction documents (hereinafter referred to as the "Transaction Documents").

1. *Murabahah*
   a. Purchase Request and *Wa'd* (*Murabahah*);
   b. Agency Letter (*Murabahah*);
   c. Sale Memo (*Murabahah*).

2. *Tawarruq (Commodity Murabahah)*
   a. Purchase Request and *Wa'd* (*Tawarruq*);
   b. Bank's Acceptance and Sale (*Tawarruq*);
   c. Customer's Acceptance (*Tawarruq*); and
   d. Agency Letter (*Tawarruq*).

SF-i (Pre-Shipment)

i. Appendix VI - Organisation Chart

Key Management Team

The following key personnel are supporting Captain Azhanudin and Captain Paramjit on the day-to-day business operation:

1. **Mr. Hambali Abdul Rani, aged 49 – Chief Executive Officer**

- Mr. Hambali has been on-boarded as the Chief Executive Officer of AGB in 2024. His responsibility is to assist the directors in managing the overall business operation of Agro 19 Group. He had known Captain Paramjit for more than 20 years prior to joining AGB.

- Mr. Hambali is a dynamic and result-oriented professional with over 15 years' experience in the palm oil industry and corporate training. He is an International Certified Professional Trainer under the International Professional Managers Association (UK) and a qualified Train-The-Trainer (TTT) professional. Mr. Hambali has worked across multiple industries, including shipping, medical, food & beverage, and palm oil. With a strong foundation in customer service, sales and marketing, operations, and business development as well as his refined skills in client engagement, product demonstration, and sales strategy, he has the ability to drive sustainable growth across the team and business.

2. **Ms. Nurul Najat Bt Halim, aged 37 – Account Manager**

- Ms. Nurul joined AGB in October 2022, overseeing the overall Agro 19 Group's accounting aspects including regulatory compliance, financial integrity as well as managing the group's banking matters.

- Ms. Nurul Najat holds a Bachelor's Degree in Accounting from the International Islamic University Malaysia (IIUM). Prior to joining AGB, she worked with various audit and accounting firms for the past 10 years.

3. **Mr. Abdulrahman Hussein Abdullah Alkaf, aged 44 – Chief Sales Officer**

- Mr. Abdulrahman joined AGB in 2017 (8 years), leading the company's international sales strategies with a strong focus on market growth, client relationships, and revenue generation. He holds a Master's Degree in Computer Science.

- Mr. Abdulrahman plays a key role in driving the company's expansion across global markets, particularly in the palm oil and food commodities sector. He is known for his ability to lead high-performing sales team, build long-term client trust, and navigate complex market dynamics with confidence and clarity. With a strong foundation in sales, technology and business governance, Mr. Abdulrahman delivers strategic value to the company by aligning business objectives with regulatory compliance and sustainable growth initiatives.

4. **Mr. Dharminder Singh, aged 53 – Head of Local Sales**

- Mr Dharminder is the brother of Captain Paramjit. He joined AGB in 2014 and is responsible for leading the local sales team. Mr Dharminder has played his role in strengthening the company's domestic market presence.

- Mr Dharminder holds a Master's Degree in Information Technology and is a certified Project Management Professional (PMP). He has more than 20 years of experience in managing complex IT projects across diverse industries, he brings a unique blend of technology, expertise and strategic leadership to his role. His strong analytical skills, combined with a customer-centric approach, contributed significantly to sales growth, operational efficiency, and long-term client partnerships.
